DRY NEEDLING

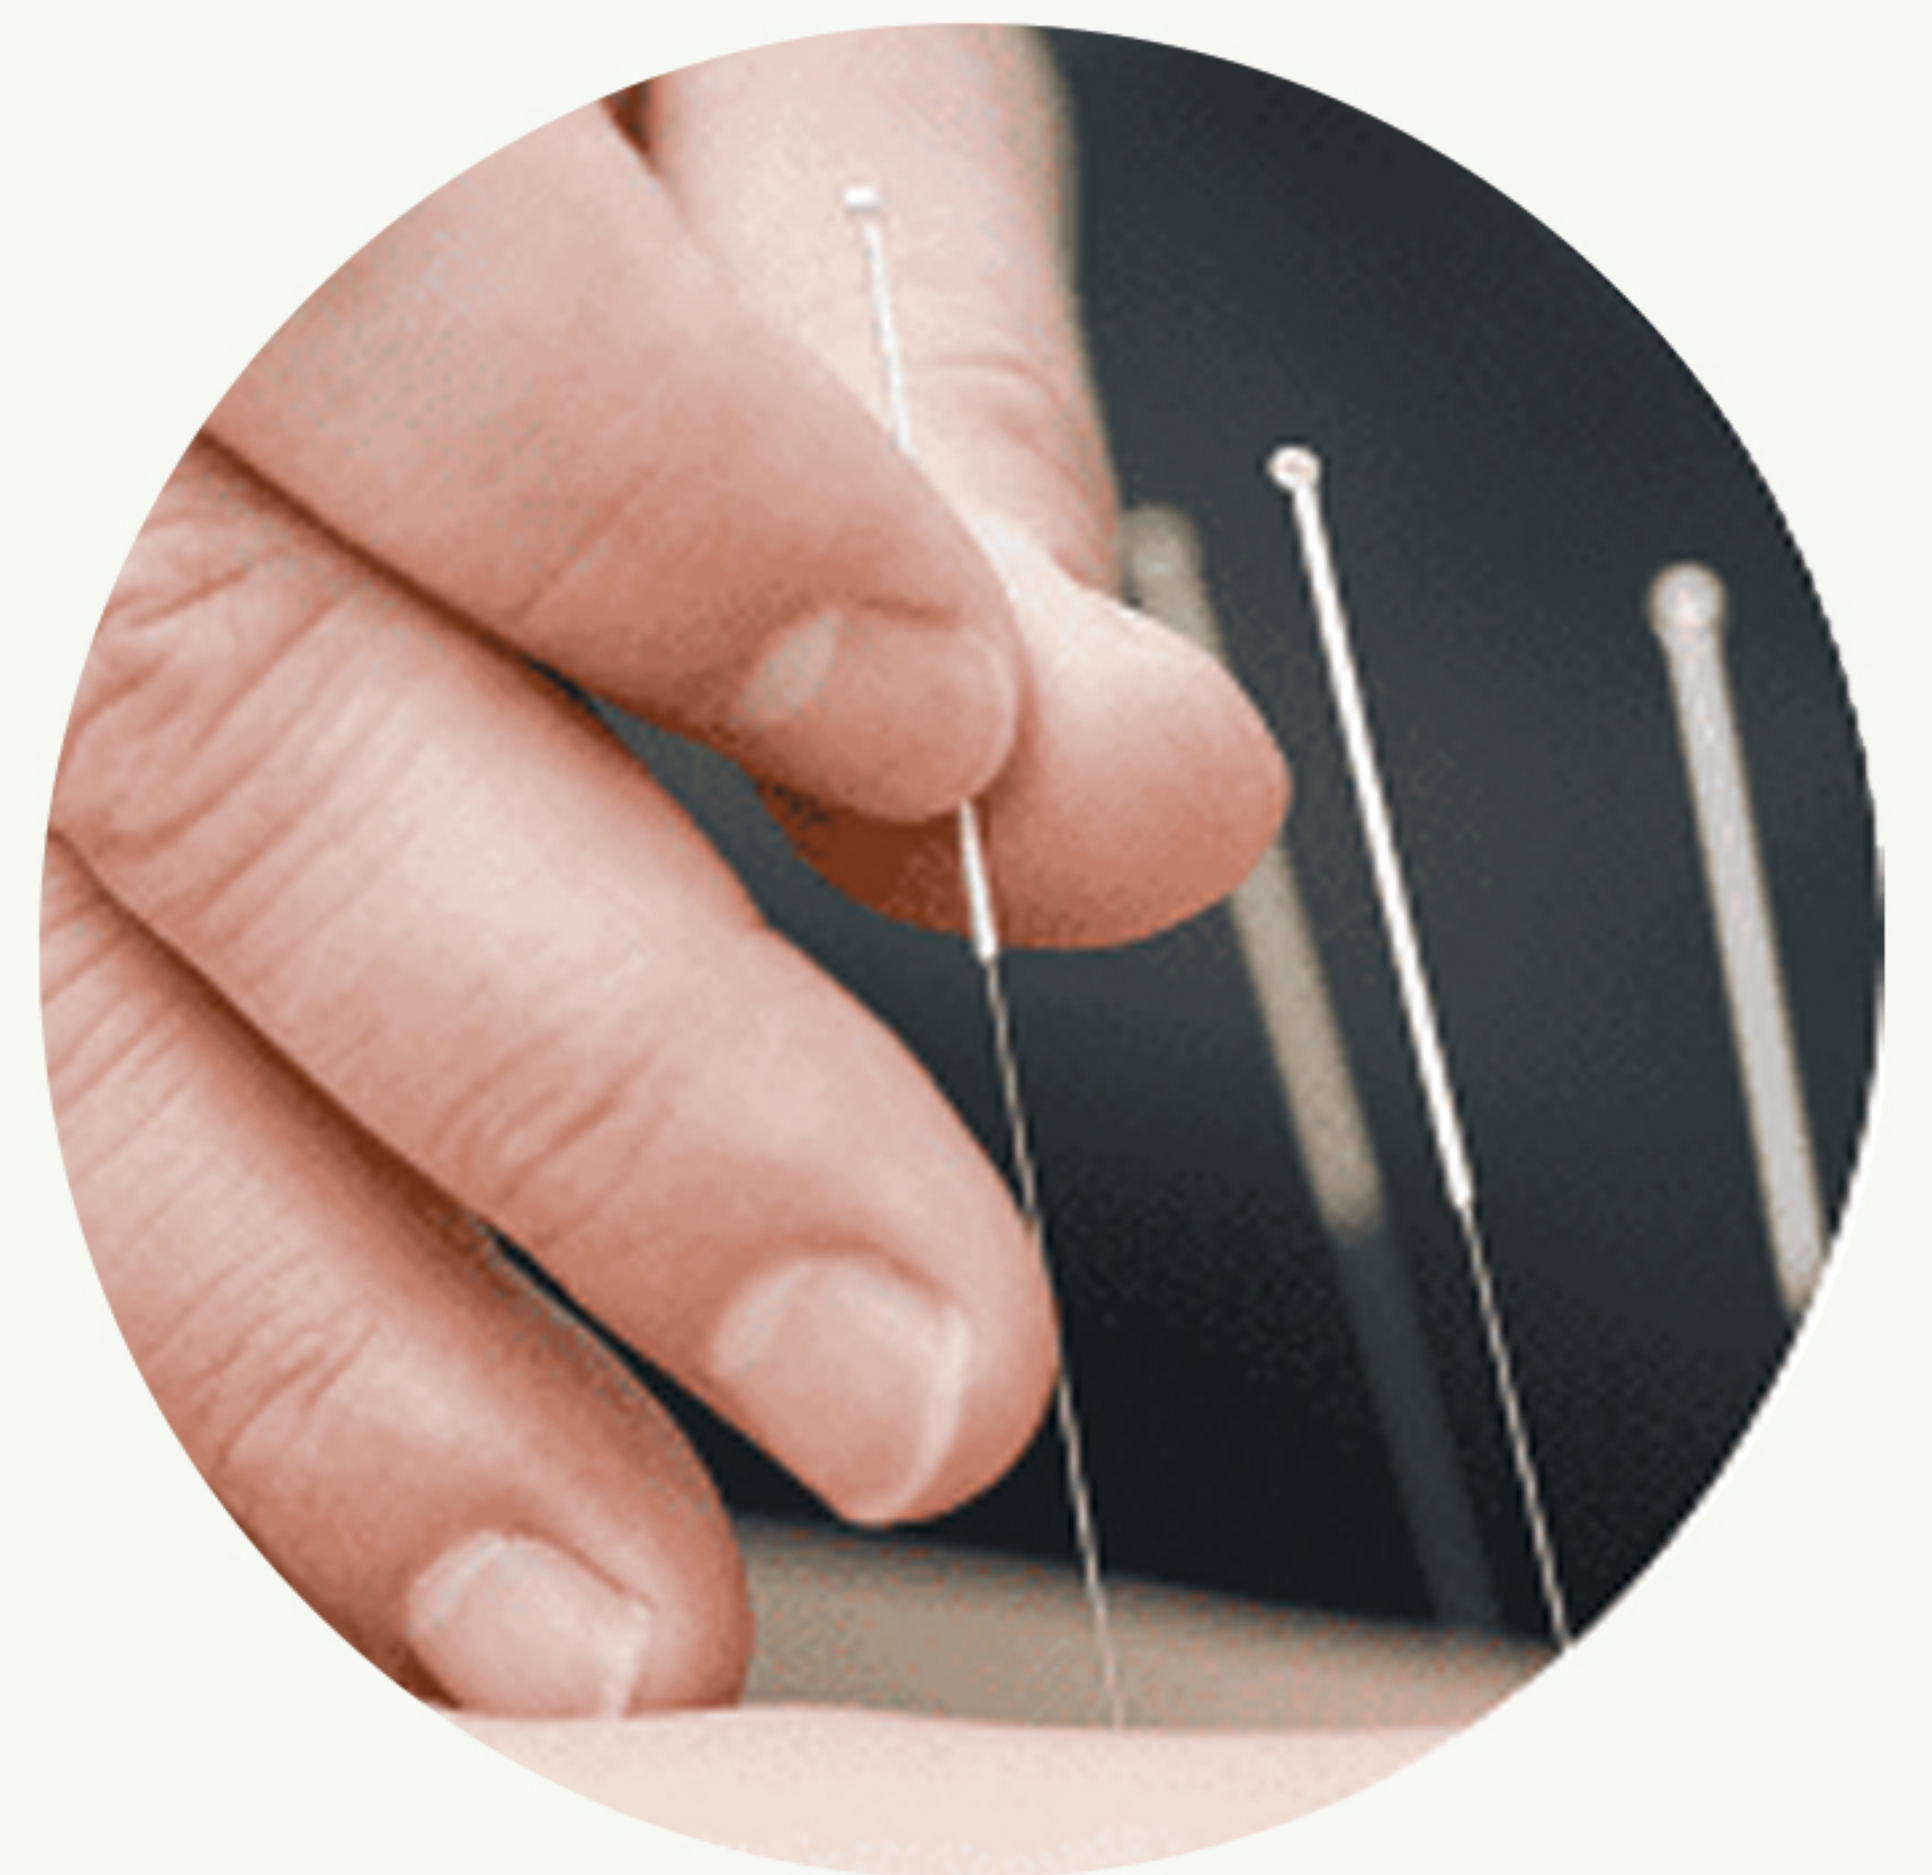

Dry needling is a technique that physical therapists use to treat pain and muscle tension. It involves inserting thin needles into trigger points in the muscles, which are the areas of tightness and discomfort.

How does Dry Needling work?

The needles help to release the tension and promote healing by increasing blood flow and stimulating the body's natural pain-relieving mechanisms.

Dry Needling Helps To Relieve;

- Hip Pain
- Neck Pain
- Knee Pain
- Shoulder Pain
- Lower Back Pain
- Myofascial Pain
- Headache & Migraine

WORLD NURSES DAY

Shifa International Hospital Faisalabad has the utmost respect for the unwavering commitment of highly devoted nurses, who are an integral component of the healthcare infrastructure.

To honor them, Shifa International Hospital commemorated "World Nurses Day" recognizing the exceptional contributions our nursing staff has made towards the betterment of our community.

Their unwavering dedication to provide round-the-clock healthcare services to the patients has been invaluable and is highly acknowledged.
